General and Revenue Secretariat | Mel File No 118 of 1919

Serial No 3

To the Chf Engr & Report No B 6948 & 8 9 1922

Subts for Sanction the revised drainage Scheme for the Davangere Town estg Rs 86,087

18. In 1917 a preliminary drainage project estg Rs 132000 was prepared The Govt ordered that a less costly project might be prepared & that Govt would contribute a moiety of the cost- if it did not exceed Rs 1,00,000/

19 The revised project costs Rs 86,087 The Municipal Council at their meeting held on the 17th & 18th Sept 1919 resolved to meet their share of the cost from the closing balance & recoupment from the Sale of Sites. The ~~Standing~~ Closing ~~or~~ balance in favour of the Davangere Town Mncl for 1922-23 is estimated at Rs 68,370.

20 In the order of 19 6 1919 it is mentioned that a loan should be raised locally for the whole cost of the project As the Municipal Council evidently do not find any necessity to raise a loan as repayable to meet their share of the cost the question as to how the Govt share has to be met

M. File No 118 of 19 19

25 The situation is now far different from what it was in June 1919 It is not possible for Government to give in the next two or three years a grant-in-aid of Rs 43,000 for this purpose It would be inadvisable to permit the Municipality to undertake the project with funds sufficient for meeting its own share of the cost in the expectation that the Government share will be provided as a matter of certainty. The embarrassing situation created by incomplete works of the Public Works and Capital Works Departments is well known and unless and until we feel confident of actually providing the money required, we ought not to undertake future commitments The money available for grants-in-aid in the next two or three years for grants-in-aid for sanitary works will be very limited and it will in all probability, be not possible to meet the demands of comparatively large items of outlay like this In these circumstances, only t w o courses are open The Municipality will have to put off the work until Government are in a position to give the grant promised by them If, however, the work cannot afford to wait, the Municipality will hav to make its own arrangements for financing the total outlay.

* * * * * *

The question of water-supply and drainage has always been cropping up before Government in various forms during the past several years in respect of most of the important towns in the Mysore State * * * *
As regards the drainage scheme I should be inclined to ask for a little patience, because, it is necessary that you should perfect your water supply scheme and then go in for the drainage For, I understand, that the drainage scheme is going to be a very costly one and it is no use my giving you any vague promises that in the near future Government will be able to contribute a moiety of the cost of the scheme so that the work may be started soon * * *

Sir,

Adverting to para 2 of Government order No.R.16257-59, Ml.182-17-4 dated 19th June 1919 re the question of financing the drainage scheme of the Davangere town, I have the honor to state that the Municipal Council of Davangere have proposed to meet their share of the cost of the project amounting to Rs 50,000 out of the closing balance at the credit of the municipality and to make up the amount thus spent by the disposal of sites in the Chamarajendrapet extensions which is estimated to fetch Rs 40000 at any time.

An extract from the resolutions of the municipal council is herewith submitted for favor of perusal with a request that the preparation of plans and estimates may kindly be ordered to be expedited by the Sanitary Division as early as practicable.

I have the honor to be,
S I R,
Your most obedient servant,

Deputy Commissioner,

MYSORE PUBLIC WORKS DEPARTMENT,
CENTRAL OFFICE,
Dated Bangalore 24th September 1922.

I 1425 - 22

FROM

S CADAMBI, Esq,
Chief Engineer of Mysore, Bangalore.

To

T. E. Jayarama Iyer, Esqr., 'B.A.', B.L.,
Secretary to the Government of Mysore,
Revenue Department, Bangalore.

Rev 118-19—3

SIR,

Adverting to Government order No.R.16257-59/M1.182-17-4 dated the 19th June 1919, I have the honour to forward herewith for favour of sanction, the accompanying project prepared by the Superintending Engineer, Sanitary Circle, for improving the drainage of Davangere Town. The cost of the project in 1921 amounted to Rs81,687 which is the one sent to the Sanitary Board for opinion. After return of this by the Board, the Superintending Engineer reported that enhanced rates will have to be provided for the marginally noted items to suit the present conditions which brings the estimate to Rs86,087.

Item of work	Estimate	Enhanced rate	Excess amount.
Burnt stone in clay per 100 c.ft.	Rs18-12-0	Rs31-4-0	Rs3,465
Burnt stone in morter	Rs32-0-0	Rs37-8-0	702
Dry rough stone revetment rew per 100 cft.	5-8-0	7-0-0	23
			Rs4190
Contingencies at 5%			210
			Rs4400

2. The report attached to the estimate and the office note accompanying explain in detail the items of work provided for.

3. The opinion of the Central Sanitary Board was invited on the project and they have stated that in place of concrete drains,

open drains should be built entirely of slabs well laid in a bed of concrete, as the former has proved a failure elsewhere. But, for reasons explained in his letter No.152 dated the 15th July 1922 (copy enclosed) the Superintending Engineer, Sanitary Circle differs from the recommendation of the Central Sanitary Board, and thinks that concrete drains are more suitable. I agree with the Superintending Engineer and would recommend concrete drains being used. There is no reason why they should not be found satisfactory at Davangere, while they have provided so in Bangalore Extensions, [illegible]

I have the honour to be,

Sir,

Your most obedient servant,

Chief Engineer of Mysore.

Letter No.152 dated the 15th July 1922 from the Superintending Engineer, Sanitary Circle, to the Chief Engineer of Mysore, Bangalore

---

Drainage Scheme of the Davangere Town.

With reference to your No.B.8864 dated 31st May 1922, returning the above estimate amounting to Rs81,687 for the above and requesting to modify the same on the line suggested or to furnish my opinion as to why the alternative recommended by the Central Sanitary Board may not be adopted, I have the honour to state, that I am not in favour of altering the designs proposed. These types of drains have been used all over the Extensions in Bangalore and have proved satisfactory. They are also adopted all over the Madras Presidency by the Sanitary Engineering Department and are recognised as standard types of drains.

2. To slabbed drains as storm water carries I have no objection but where both sewage and storm water are carried by the same drain, I have no hesitation in saying that the slabbed drain is unsatisfactory, as the free flow of sewage is impeaded and stagnation takes place. If the drains are properly constructed as is done in the Sanitary Division they will be found to be quite satisfactory.

3. The enclosures received with the reference are herewith returned.

Proceedings of the Central Sanitary Board in Mysore

R e a d:-

Letter No.B 2890 dated the 15th October 1921 from the Chief Engineer of Mysore forwarding a project amounting to ₹ 81,687/- representing the minimum requirements to place the drainage of the Davangere town on a satisfactory basis, the works consisting of construction, repair or improvement of conservancy and storm water drains, construction or ----- improvement of tunnels and diversion of present outfall of the sewage into the tank by intercepting and conveying it by an underground pipe conduit across the ridge to the west of the town, to join the main drain in the North-West corner of the town.

Resolution No.3 Dated 13th May 1922

Resolved that the project be approved with the following modification:-

That in place of concrete drains, open drains should be built entirely of slabs well laid in a bed of concrete as the former has proved a failure elsewhere

SUPERINTENDING ENGINEER'S CIRCLE. Regd. No. 1 JUN SANITARY CIRCLE.

...ing the Drainage of Davangere Town.

Davangere is a busy trade centre with a population of 10,074 and possesses the richest Municipality in the - State next to Bangalore and Mysore Cities.

2. The water supply to the town is provided by pumping water from the Thungabhaara river 9 miles off at the rate of about 1,50,000 daily. This has rendered the question of improving the drainage of the town rather urgent.

MYSORE GOVT. SECRETARIAT'S OFFICE Regd. V. 19 JUL 1922

3. A project amounting to Rs1,32,960 was submitted to Government for the above and they were pleased to accord - administrative sanction to the scheme in their order No. R.16257-59/M1.182-17-4 dated 19th June 1919 with the direction that a cheaper and simpler scheme for the drainage be prepared and submitted, etc.,

MYSORE GOVT. SECRETARIAT'S OFFICE Regd. V 19 AUG 1922

4. Accordingly, the present estimate aggregating to Rs81,687 has been got up as per details noted below -

I.	Constructing conservancy and storm water drains. ...	Rs37,099
II.	Improving, reconstructing and repairing the existing conservancy and storm water drains.	Rs26,337
III.	Constructing new tunnels and drops.	Rs 7,091
IV.	Improving and repairing old tunnels.	Rs 2,086
V.	Construct ng underground pipe sewers including manholes, cisterns, etc.,	Rs 4,695
VI.	Acquisition of houses etc., ..	Rs 490
	Total.	Rs 77,798
	Contingencies at 5 per cent.	Rs 3,889
	Grand Total. ...	Rs81,687

GOVT. SECRETARIAT'S OFFICE 7 MAY 1923

5. The sewage of the whole town is proposed to be led

into two main drains (by means of subsidiary drains) one in each of the two drainage blocks into which the town is divi

Other improvements proposed are -

(i) The conservancy and storm water drains are propo to be constructed in addition to the improvements and repairs to the existing drains so as to suit present drainage proposals.

(ii) New tunnels are proposed to be constructed where necessary with improvements and repairs to the old ones.

iii) The sewage will not be allowed to enter into the Davangere Tank (to the west of the Town) as now, will be intercepted and conveyed by an undergrou pipe conduit across the ridge here so as to join main drain in the North-west corner of the Town.

(iv) The houses coming in the way and requiring re will be acquired and dismantled.

6. The present scheme represents the minimum requ ments to place the drainage of the Town on a satisfactory basis and will have to be sanctioned in its entirety

No 15

MYSORE PUBLIC WORKS DEPARTMENT,
CENTRAL OFFICE,

Dated Bangalore 14 September 1922.

FROM

John Bhore, Esq., A.M.I.C.E.,
Chief Engineer for Irrigation, Bangalore

To

BANGALORE.

K. Matthan, Esq., B.A.,
Chief Secretary to Government of Mysore,
Bangalore

Sir,

With reference to item No.12 of the responsibility sheet in respect of subjects noted in the Tour Notes of the 3rd Member of Council in the Chitaldrug District, (now Second Member) issued under official memorandum No.M 6152-210/G.A 82-21-6 dated the 30th June 1922, I have the honour to inform you that a project amounting to Rs81,687 for the drainage of the Davangere Town has been forwarded to the Revenue Secretary for orders, in this office No.B.1948 of the 8th September 1922 (copy enclosed) for ready reference.

I have the honour to be,

Sir,

Your most obedient servant

Chief Engineer for Irrigation.

Letter No.194 dated the 6th September 1922 from the Chief Engineer of Mysore to the Secretary to Government, Revenue Department, Bangalore

---

Adverting to Government Order No F 16257-59/ML.182-17-4 dated the 19th June 1919, I have the honour to forward herewith, for favour of sanction, the accompanying project prepared by the Superintending Engineer, Sanitary Circle, for improving the drainage of Davangere Town. The cost of the project as per estimate prepared in 1921 amounted to Rs.61687/- which is the one sent to the Sanitary Board for opinion After return of this by the Board, the Superintending Engineer reported that enhanced rates have to be provided for the marginally noted items to suit the present conditions, which brings the estimate to Rs 66,087

Item of work	Estimate rate	Enhanced rate	Excess amount Rs
Burnt stone in clay per 100 c ft	18-12-0	31-4-0	3,465
Burnt stone in mortar -do-	32-0-0	37-8-0	702
Dry rough stone revetment new per 100 c ft	5-8-0	7-0-0	23
			4,190
Contingencies at 5%			210
			4,400

2 The report attached to the estimate and the office note accompanying explain in detail the items of work provided for

3 The opinion of the Central Sanitary Board was invited on the project, and they have stated that in place of concrete drains, open drains should be built entirely of slabs well laid in a bed of concrete, as the former has proved a failure elsewhere But, for reasons explained in his letter No 152 dated the 15th July 1922 (copy enclosed), the Superintending Engineer Sanitary Circle differs from the recommendation of the Central Sanitary Board and thinks that concrete drains are more suitable I agree with the Superintending Engineer and would recommend concrete drains being used There is no reason why they should not be found satisfactory at Davangere while they have proved so in Bangalore

Chief Engineer for Irrigation 19/9/22

~~Assistant Secretary to Government~~,

~~Public Works~~ Department

S.P.16th

G R S VI—G/82]

Letter No 152 dated the 15th July 1922 from the Superintending Engineer, Sanitary Circle, to the Chief Engineer of Mysore, Bangalore.

Drainage Scheme of the Davangere Town.

With reference to your No.B.8864 dated 31st May 1922, returning the above estimate amounting to Rs81,687 for the above and requesting to modify the same on the lines suggested or to furnish my opinion as to why the alternative recommended by the Central Sanitary Board may not be adopted, I have the honour to state that I am not in favour of altering the designs prepared These types of drains have been used all over the Extensions in Bangalore, and have proved satisfactory. They are also adopted all over the Madras Presidency by the Sanitary Engineering Department and are recognised as standard types of drains.

2. To slabbed drains as storm water carries I have no objection but where both sewage and storm water are carried by the same drain, I have no hesitation in saying that the slabbed drain is unsatisfactory as the free flow of sewage is impeaded and stagnation takes place. If the drain are properly constructed as is done in the Sanitary Division, they will be found to be quite satisfactory.

3. The enclosures received with the reference are herewith returned.
